A web developer with over 6 years developing websites and web base applications for commercial use.

PROFESSIONAL EXPERIENCE

Web Developer / System Administrator | South Travels and Tourism

APRIL 2016 – CURRENTLY WORKING HERE

Part of a small IT department, my main responsibilities are to maintain and update company's existing website and web server.

- Converted the company website into responsive following the mobile first rule and using bootstrap css framework.
- Built an online booking system for hotel and travel insurance via API connectivity with third party providers using REST and SOAP web services
- Ensure that all of the b2c webpages are SEO friendly by adding the important meta tags that most of major search engines can read and understand.
- Integrated a payment gateway for online transactions
- Built a dashboard system for back office staff.
- Installed a security on company's web server to prevent brute force attack.
- Keeping the web server updated specially on the technologies that I have used on the website and on the web application
- Monitoring the company's existing google adwords account just to make sure that we stay on top of the pages base on the keywords.
- Giving some technical assistance to each of my colleague's workstation if they require.

Front End Web Developer | Yanjoon Holiday Homes

DECEMBER 2014 – APRIL 2016

Part of a small development team actually we are only 2, my responsibilities mainly is to create the design mock up into a web page using HTML, CSS, Javascript

- Transform the design mock up for the company's website using HTML, CSS, and Javascript.
- Creating html email templates for the email campaign purpose.
- Helped with some backend job like refactoring the database queries and refactoring some backend scripts.
- Giving some technical assistance to each of my colleague's workstation if they require.

Web Developer/ System Administrator | Summer Breeze Travel and Tourism

AUGUST 2013 – DECEMBER 2014

Working as the only IT personnel for this start up company.

- Built the company's website from scratch from a mock up design
- Deployed an email server which was hosted in house
- Giving some technical assistance to each of my colleague's workstation if they require.
- Deployed a server to house the accounting software.
- Creating html email templates for the email campaign purpose.

Free Lance Web Developer | Philippines

JANUARY 2010 – AUGUST 2013

My clients are from all around the globe building websites for personal, blogs, and commercial use.

- Convert design mock up into a working web page using html, css and javascript
- Create a wordpress theme from design mock up
- Install and setup a wordpress into a web hosting account
- Convert existing website into a fully responsive website base on the design mock up.
- Creating html email templates for the email campaign purpose.
